

Reading**By Jack Hale**

We have been reading I Survived the Sinking of the Titanic in read aloud time with Mrs. Johanson's class. The main character, George, went to see a mummy in the G level of the ship when it hit an iceberg. George and his family were put on a boat, but George was pulled off because he looked too old. George hit his head on the deck when he got pulled off. Mondo, a friend of his, picked him up and together they jumped into the water. Mondo and George were able to swim to a lifeboat. Mrs. Harris made a slideshow that told us a lot of different information about the Titanic.

Science/Social Studies**By Callie Nuber**

In social studies we are learning about the compass rose, continents, and oceans. We now know that the seven continents are Australia, Asia, Antarctica, Europe, North America, South America, and Africa. We know the directions on the compass rose are north, east, south, west, southeast, northeast, southwest, and southeast. We know that the five oceans are the Indian, Atlantic, Arctic, Pacific and Southern. Hemispheres are also being taught.

Writing**By Ayan Ahuja**

I am on the Spell Bowl team for third grade. I know we all want to earn a medal, but I think we need to earn a medal. We practice with Mrs. Harris two days a week at lunch and at home every day. I have friends that are on other Spell Bowl teams too. In class we are working on responding to prompts. We are practicing together and have assignments on our own. We all copied a response plan into our journals. We practice writing paragraphs. A lot of us forget to indent, and we have to redo it to fix it. We keep working hard. Our wordmaster challenge is coming soon.

Specials**By Mrs. Harris**

→ Art in the Studio-Mrs. Harris Luckily, Mrs. Workman made up the class we missed from snow days. We started a weaving project that can be finished at home.

Upcoming Dates

-**Weds, 2/27** Tuck
Everlasting field trip to PHS
-**Weds, 2/27 & 3/6** PVU
-**Weds, 3/13** PV Tony Sacco's night
-**Tues, 3/18 - Fri, 3/29**
IREAD testing window. Please avoid appointments and absences during this time.

Math**By Asahi Yamazaki**

Today my math class worked on Scratch. Scratch is where you pick the doll you want to go and you use it to make shapes like flowers and hexagons. We are also starting to work on using parentheses in equations. When you solve an equation with many operations you have to use order of operations or PEMDAS. The order you do the operations matters. Parentheses are first, then exponents, the multiplication and division, and then addition and subtraction. It takes practice, but is easy and fun once you get used to it.

Teacher Tidbits

- I hope that all the winter weather eLearning days are passed. eLearning is not an exact science; THANK YOU to all families for your patience, endurance, and perseverance to get the lesson completed. Please send me some feedback on the activities; I am always trying to be better.
- We are good on tissues for now, THANK YOU! Our class could still use gallon size plastic bags.
